

## Pair VRTuned V2 Tuning Box with your smartphone

According to your operating system (**Android** and **Apple**), the steps for connecting the V2 Tuning Box and your smartphone may vary. Please find the most important steps below. In general, you should follow the instructions given by your smartphone for the connection.

**i**

- The connection between the V2 Tuning Box and your smartphone is set up in the last step of the installation process.
- The V2 Tuning Box is fully functional even if there is no connection to a smartphone running the Tuning: Pro app.
- The V2 Tuning Box is now in the factory setting **SPORT**.

- 1** Download the free **Tuning: Pro** app by scanning the QR code ( with phone camera ) or Selecting the links below.

<https://qrco.de/bcfuU>

- 2** Switch on the ignition of your car. **Do not** start the engine.

- 3** Activate the Bluetooth function of your smartphone.

- 4** Open the Tuning: Pro app.

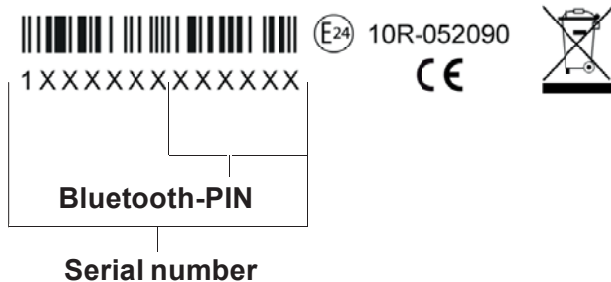

- 5** With opening the Tuning: Pro app for the first time, the installation dialogue for chip tuning by VRTuned is shown. Touch **ADD PRODUCT** and follow the instructions given by your smartphone.

- 6** You can enter the serial number by hand (touch **MANUALLY**) or with the barcode scanner of the camera (touch ). Confirm the entry with **NEXT**.

The 13-digit serial number is located on the cover of your user manual (paper version). Alternative you can also find the serial number on the FCI connector of the Tuning Box. The Bluetooth PIN consists of the last 6 digits of the serial number.

### Having trouble with connecting V2 Tuning Box and your phone's Bluetooth?

Follow these steps one by one until the pairing is complete:

1. Check that the car's ignition is switched on.
2. Check that the Bluetooth function on your smartphone is fully activated.
3. Check to see if the Tuning Box's Bluetooth connection is active (see *Overview of the V2 Tuning Box*). If the Bluetooth symbol is flashing or not lit, please contact our customer service.
4. Deactivate and then re-activate the Bluetooth connection. Check if Tuning Box and your phone will pair now.
5. Re-start the Tuning: Pro app.
6. Go to your smartphone's settings and view all discoverable Bluetooth devices. If your V2 Tuning Box is not visible, please contact our customer service.

- 7** As soon as the connection is set up, the installation is completed.

## *The Tuning: Pro app – Selecting a tuning stage*

### **Legal warning:**

- **Traffic regulations in many countries make it illegal for drivers to have a smartphone in their hand while driving, or even when the engine is running.**

Open the **Tuning: Pro** app. You can find the tuning stages offered by your VRTuned under the menu heading Tuning Stages. For safety reasons, you can select the tuning stage only when the car's ignition is on but the motor is not running.

### EFFICIENCY

Helps reduce consumption when used in combination with an economical driving style.

### SPORT

Perfect for more enthusiastic driving.

### RACE

Maximum power enhancement and performance.

### STOCK TUNE

Deactivates the Tuning Box.

### WARM-UP TIMER

You decide when the Tuning Box switches on and enhances the power available. Making the VRTuned-enhanced power available only after the engine has reached a specific temperature reduces strain on the engine components.
