

The Leatt-Brace® helps protect against:

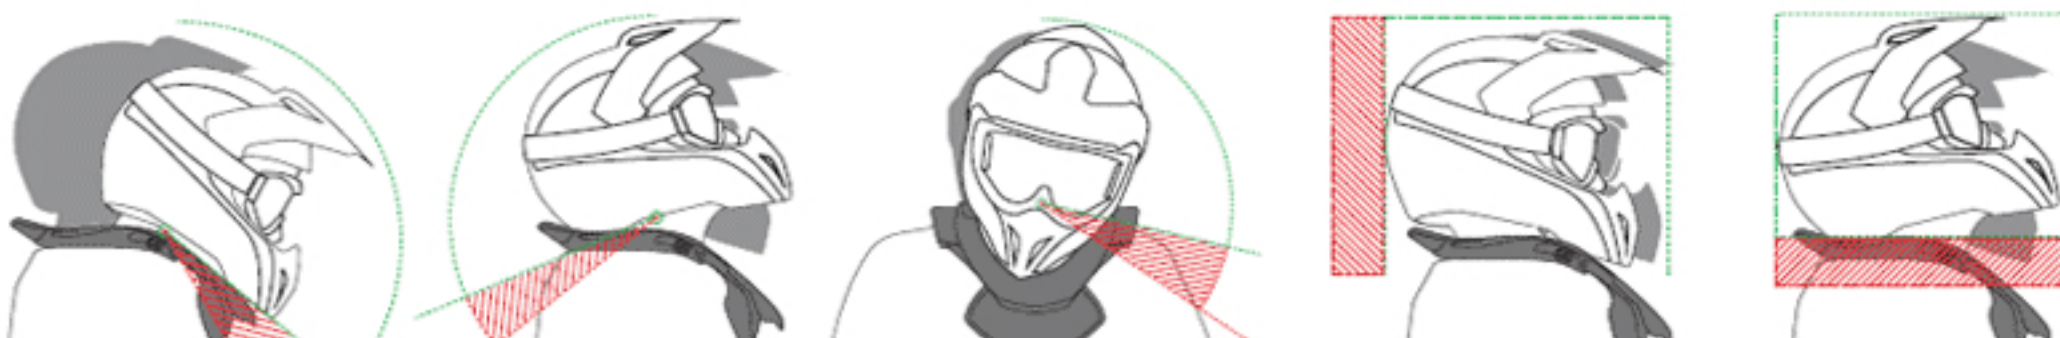

1. Hyperflexion:
over-bending of the head in forward direction.

2. Hyperextension:
over-bending of the head in rearward direction.

3. Lateral Hyperflexion:
over-bending of the head to one side.

4. Posterior Hypertranslation:
extreme movement of head and helmet, rearward on the neck.

5. Vertical Forces:
Axial loading forces transmitted vertically down the neck.
