

GT-R R35 396mm 2-pc Front Rotors Installation Guide

This 396x34mm 2-piece front rotor can be fitted onto 2008-2011 GT-R R35 (CBA), or 2012+ GT-R R35 (DBA/EBA). The only difference is the thickness of the caliper spacers. 2008-2011 GT-R utilize the thicker 9mm spacers, while 2012+ GT-R utilize the thinner 4mm spacers. This rotor kit include spacers for both applications. During installation, place the correct spacers between the mounting points of the calipers and knuckles. There are 3 caliper mounting bolts on each caliper (two M12 socket head bolts on the ends of the caliper, and one M8 bolt in the middle). Refer to Fig. 1 for more info.

- For 2008-2011 GT-R R35 (CBA), use the thicker 9mm spacers as shown below in Fig. 2

- For 2012+ GT-R R35 (DBA/EBA), use the thinner 4mm spacers as shown below in Fig. 3
