

R-2155

6th GEN CAMARO FIRE EXTINGUISHER MOUNT

The Brey-Krause R-2155 Fire Extinguisher Mount has been designed to bolt onto the Passenger Side without modification and provide a mounting point for an Amerex brand 2.5 lb. fire extinguisher w/mounting bracket.

Step 1.

It is recommended to remove the Passenger side seat from the car to allow an easier installation of the R-2155 Fire Extinguisher mount. First slide the seat forward to remove the two bolts at the rear of the sliders securing the seat to the chassis.

Step 2.

Then slide the seat rearward to lift the seat up and pivot it out of the floor pan slots at the front of the sliders. You will then be able to access the wiring harness plug found under the seat. Use a small flat head screw driver to slide the locking tab, separating the plug from itself.

Step 3.

The R-2155 comes with four self tapping screws. The R-2155 brackets have four holes that line up with 4 holes on the bottom of the seat. Use the self tapping screws to attach the R-2155 to the bottom of the seat frame.

Step 4.

Finished installation should look like this.

Performance driving events are by nature potentially hazardous to your health. Brey-Krause Mfg. Co. Inc. shall not be liable for injury, consequential, or other types of damages resulting from the use or misuse of our products. Proper installation of these parts is critical and should only be done by a professional shop.
